

COVID-19

CORONAVIRUS DISEASE

Safety and Sanitizing Solutions
to help your employees and
visitors stay safe.

Hand Sanitizer Stands

These branded hand sanitizer stands hold a refillable dispenser with the option of a customizable health and hygiene message area.

These stations can be placed in multiple locations in your facility to help minimize the spread of germs.

Wall Mounted Sanitizer Stations

High-traffic common areas contain many frequently touched surfaces.

Add branded wall mounted sanitizing stations throughout your facility to help reduce the spread of germs. These stations include a sanitizing station (pump activated or hands free). Optional towel/wipe dispenser available.

Wayfinding and Social Distancing Signage

Removable floor and wall graphics for social distancing guidelines, traffic flow control, and wayfinding.

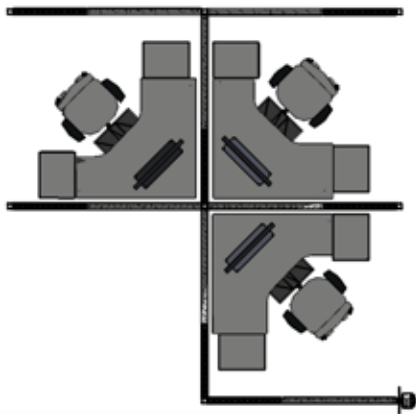

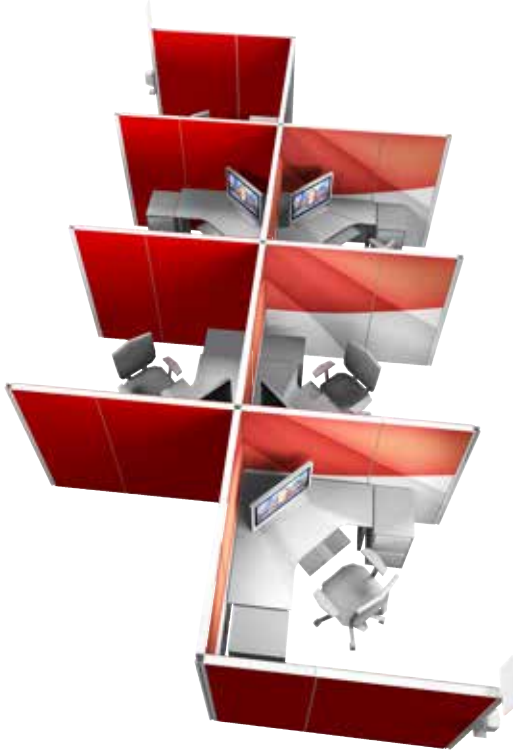

Our **social distancing floor graphics** are a clear way to delineate personal boundaries and create physical space between customers in busy environments such as grocery stores, banks, shopping centers, and other essential locations such as the production floor of your factory.

By creating personal space in high-traffic social environments, businesses can limit the spread of germs, viruses, harmful bacteria, or other contaminants, especially for seasonal illnesses. Pre-printed social distancing floor signs clearly mark safe distances in public spaces, allowing customers to shop, and cash out without the need to interact closely with others. These signs are printed with a removeable vinyl material, making them durable in busy locations and leaving no residue on the floor when done. Use indoor or outdoor social distancing floor signs to mediate regular checkout lines, in-store pickup locations, or curb-side loading stations.

Office Partitions and Safety Dividers

The 'New Normal' for offices post Covid-19

Is your office prepared to reopen post COVID-19? Rather than investing in costly remodels, organizations are now trying to reconfigure existing spaces, with an eye towards keeping employees safe from infection and giving them the peace of mind needed to return.

Modular partition dividers, and safety shields can be adapted and installed in existing cubicles. Hand sanitizer dispensers and other accessories can be mounted to the framework. Custom branding for employees can be added to help personalize the spaces.

Available with printable antimicrobial fabrics for improved workplace safety.

Indoor/Outdoor Handwashing Kiosks

Polyethylene construction

Stainless steel option

A self contained hand washing station with soap and towel dispenser. Header and side panels offer an area to place messaging and branding. These mobile units are weather proof and can be used in common areas inside or outside. These can be operated via foot pump and have a hands-free option for minimizing contact points. A refillable reservoir and gray water holding tank are included beneath the cabinet so facilities management personnel can access for service.

Removable floor and wall graphics can be added for social distancing guidelines, traffic flow control, and wayfinding.

** Products shown subject to availability.
Some substitution may be necessary to meet delivery time.

Desk Guard

Small: 24"W x 30"H

Large: 48"W x 30"H

Acrylic shields can be expensive and with so many COVID-19 related materials needed to open your business safely – these lightweight desk guards are the perfect fit.

These are much more economical and provide the same protection. The frame is an easy-to-assemble foam board and the clear portion is **made of the same material used to make face shields.**

Available in a small or large version.
